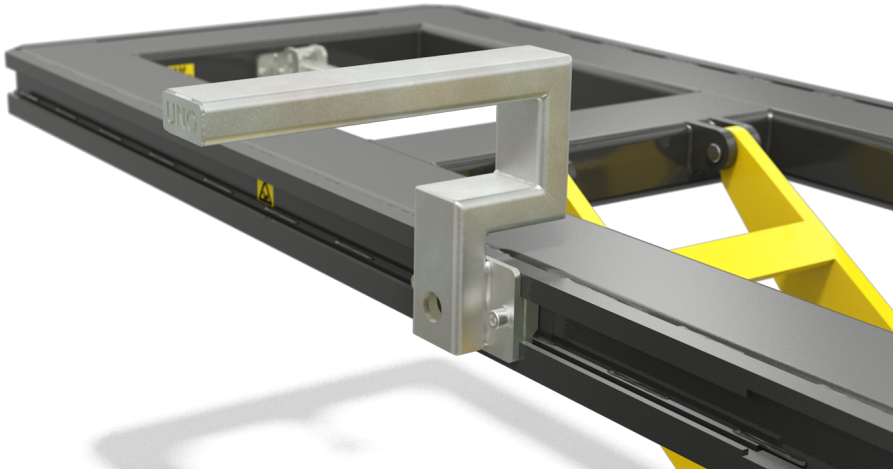
Accessories

B30 Bench Adapter



The UnoLiner B30 Bench Adapter has been developed for reparation of vehicles with a smaller tracking and chassis width, such as classic cars, microcars, and cars from the European A, B, and C segments. Thanks to the chassis clamp arms' clever design, it remains perfectly suitable for mid-size and full-size cars as well. Its patented Quick Lock one-bolt locking system makes attaching the B30 easy and safe.

Features

- Ideal for compact cars
- Compatible with all UnoLiner chassis clamps
- Compatible with all UnoLiner benches
- Fast and easy to install
- Quick Lock one-bolt locking system
