Drive-On Benches

R Series Drive-On Ramp

UnoLiner R Series Drive-On Ramps are available in different sets: the R18, R20, R25, R30, and R35, suited for the CRS3000, 4000, 4600, 5500, and 6000 straightening bench respectively. These ramps are divided into multiple sections, which hook into the bench's side profiles, making these sections quick and easy to individually place and remove. Angled drive-on ramp sections—available in lengths 600 and 1000 mm—hook and hinge into the bench end sections. All of this allows for great flexibility during vehicle repair.

Features

- Ramp divided into sections
- Sections individually removable
- Each section easy to place
- Galvanic zinc plating
- For Drive-On benches in all sizes

Technical data

Total length	3795-7140	mm
