Measuring Systems

M70 UL Measuring System Basic

The M70 UL Measuring System Basic facilitates easy vehicle chassis measuring and includes software and hardware for accurate and quick measuring during vehicle repair. The M70's simplified software package enables quick creation of PDF measuring reports. To save yearly subscription costs, it contains no vehicle database. The included hardware consists of an extendable, electronic measuring device and all the necessary accessories such as extensions, adapters, and measuring rods. These are all so easy to use that one person can do the required measuring by himself.

Features

- Point-to-point measuring
- No vehicle database / no yearly subscription costs
- Digital measuring rod and accessories included
- Export measuring reports in PDF
