Pulling and Pushing

P20 Vector Pulling Set

The UnoLiner P20 Vector Pulling Set expands the *P10 Draw Aligner*'s multifunctionality by adding one or more hydraulic cylinders with integrated chain holders. The cylinder connects to an air hydraulic pump for a pulling force of 10 metric tons. Combining the P10 Draw Aligner and the P20 results in a complete Vector Draw Aligner that can push and pull multiple points at precise angles.

Features

- Multidirectional pushing and pulling
- Ram cylinder extension tubes
- Air hydraulic pump
- Easily mounted on P10
- Great to combine with D10(T) Down Pull Adapter

Technical data

Pulling force	10	tons
Extension Tube P20-20	150	mm
Extension Tube P20-30	300	mm
Extension Shaft P20-40	750	mm
